

Spendcoin Appeal

5. Decentralisation

- The total minted supply of tokens is not controlled by a single entity or group of entities under common control, or will be controlled by a single entity or group of entities after the
- At least 10% of the total supply is freely circulating in the market or will be freely circulating after the token is released;
- The team which issued the token should have made efforts to be transparent about details of the token supply, circulating supply, and any inflation, as well as their own ownership of issued tokens.

It appears as though this is the reason why Spendcoin lost trial. We submit this appeal to break down the facts of each item.

- The total minted supply of tokens is not controlled by a single entity or group of entities under common control, or will be controlled by a single entity or group of entities after the

Spendcoin will only control by the time distribution is complete 50% (combined from Advisors/Founders/Foundation/Company) <http://spendcoin.org/services/distribution>

- At least 10% of the total supply is freely circulating in the market or will be freely circulating after the token is released;

The point here to read is “freely circulating after the token is released”. Once all tokens are released there will be 50% freely circulating. <http://spendcoin.org/services/distribution>

- The team which issued the token should have made efforts to be transparent about details of the token supply, circulating supply, and any inflation, as well as their own ownership of issued tokens.

The team has posted an exact inflation schedule and token economics/distribution information on its website transparently. <http://spendcoin.org/services/distribution>
