

Doge on Trial Escrow

Guidelines:

This is a special case regarding a dispute from our Doges on Trial pilot. The Doges on Trial experiment offered a 50 ETH bounty to the first submitter of a cat accepted into the list. The submitter uploaded the image below which was accepted into the list:

It is to be determined if the image above satisfies the following rules to receive the 50 ETH bounty.

If you believe those rules were fulfilled, vote **Pay Receiver** which will send the 50 ETH to the submitter of this image.

If you believe those rules were not fulfilled, vote **Refund Sender** which will send back the 50 ETH back to Kleros Cooperative.

Rules

- The first submitter to get a cat accepted into the list will be paid 50 ETH.
- To be considered valid, a picture must clearly display a doge or a cat. Pictures with hidden doges or cats will not be considered as valid if a normal observer would not be able to see it without help (e.g., an image with a doge only a few px large would not be considered valid, because an observer would be unable to see it with plain sight).
- Pictures which contain both a doge and a cat will not be considered valid.
