

The photo submitted does not meet the requirements specified by guideline #2. The subject's face is not facing the camera.

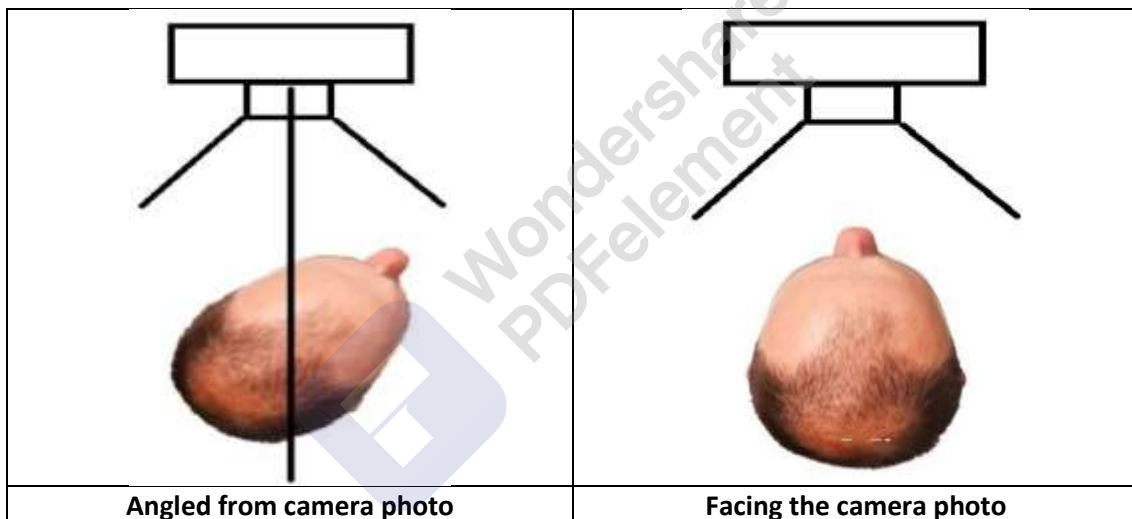

## 2. Front-facing Submitter Picture - Required

**- The picture should include the face of the submitter facing the camera and the facial features must be visible.**

- Face should not be covered under heavy make-up, large piercings or masks hindering the visibility of facial features. Headcover not covering the internal region of the face is acceptable (For example, a hijab is acceptable for a submitter but a niqab is not).

- It can include items worn daily (ex: headscarf, turban, wig, light makeup, etc) provided they do not violate the previous point. It cannot include special items worn only on special occasions that can, voluntarily or involuntarily, distract humans or algorithms from being able to detect identical faces.

It is important to underline the fact that the photo upload is not facing the camera, not even close to it, so facial features are not clearly shown.

We could use as a reference, the case #554 of Kevin Owocki, which was rejected from the Proof of Humanity Registry because of a non-facing photo on the profile:

<https://app.proofofhumanity.id/profile/0x00de4b13153673bcae2616b67bf822500d325fc3>

You could find a huge amount of evidence in such case.

If we compare both cases, we could see that INAKI's photo is even less facing the camera than OWOCKI's

Vs

**Owocki's photo**

**INAKI's photo**

Allowing profiles like this in the registry of Proof of Humanity could be a threat to future fake accounts. For that reason, I ask the jurors:

Do not accept the registration of that profile and VOTE “**NO**” for that case.

Jurors, thanks for your time.

Regards,
