

Dear Jury,

It is true that the photo is not from the front. The reality is that I did not realize that requirement when uploading the photo. I already uploaded another photo where you can see my face from the front, I understand that now you can see who I am, Inaki, the same as the one in the video. Now, if it seems to you that I should not be accepted for not complying with what is required, I request that you change the system and give the opportunity to change the profile photo once the error has been identified, since in my case nobody is wanting to use the identity from another and if they reject me I would have to enter again and I would lose about 300 dollars. When this project seeks to create a community where we can all access UBI, rejecting legitimate profiles for not complying with the requirement of a photo seems unfair to me and is far from the spirit of proof of humanity, since, in this case, it is something totally rectifiable.

Thanks,

Regards
