

As stated in the policy: *“The name should be the most commonly used name to refer to the asset. It does not necessarily need to be the official name given by project creators nor the one in the token contract.”*

The most commonly used name to refer to the asset is OVCODE. OVCODE is the name of the project/asset/blockchain/platform. OVCode is only used in the name of the company, OVCode Switzerland AG, and even there it's not used consistently. See bottom of the page of <https://ovcode.com/>:

OVCODE is the name in the token contract¹, on CoinMarketCap², on CoinGecko³, on the official Twitter⁴, on the official website⁵, on the website specifically made for the OVC asset⁶, in the Google Play App Store⁷ and in the Apple App Store⁸. According to precedence the name of the project/asset/blockchain/platform should be used, not the name of the company behind the project.

Therefore jurors should clearly vote NO in this case.

The graphic features a dark blue background with a complex network of glowing blue lines and nodes, resembling a digital or neural network. A large, stylized eye-like shape is formed by overlapping blue and purple circles. The text 'OVCODE DIGITAL TWINNING' is prominently displayed in white, bold, sans-serif font on the left side. At the bottom center, the website address 'www.ovcode.com' is visible in a smaller white font.
