

HELIAS

KLEROS' TOKEN LISTING COURT

Case #67

MAINFRAME (MFT) Token

10th May 2019

TL;DR: In accordance with the applicable rules, in case of duplicates, only the first submission should be accepted. The MAINFRAME Token (MFT) has obviously already been accepted in the list ; Consequently, the listing request must be rejected.

1. DISPUTE STATEMENT

A request for a listing of the MAINFRAME token has been submitted.

On 5 May 2019, this request was contested on the grounds that the token had already been listed.

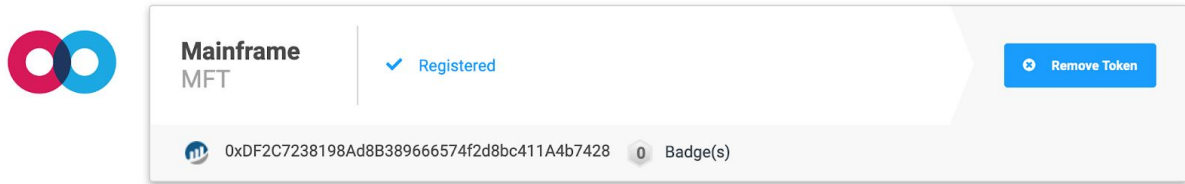

2. APPLICABLE RULE

Token Curated List Policies state that “*In case of duplicates, only the first submission should be accepted. The most recent submissions appear highest in the list.*”

3. APPLICATION TO THE CASE

The MAINFRAME Token (MFT) [has obviously already been accepted in the list.](#)

The only argument raised by the Challenger is therefore to be favourably received.

CONSEQUENTLY, THE LISTING REQUEST IS REJECTED.
